The Case For Electronic Check Services

MERCHANTAMERICA's check processing solutions help you reduce the costs of accepting checks. For example:

- Avoid bank deposit fees, return fees, re-clearing fees, etc. that all add up to a hard-dollar drag on your bottom line.
- Reduce uncollectible checks. On average about 0.6% of all checks are uncollectible, so reducing this number reduces the number of total losses.
- Eliminating paper checks from your POS and back office improves customer service and improves accounting.

The full suite of check services available from MERCHANTAMERICA allows you to avoid the risks and expenses of accepting checks, all for less than the cost of processing credit cards.
